UNIVERSITY OF MICHIGAN

3 Courses

AI for Design and Optimization

AI for Autonomous Vehicles and Robotics

AI for Energy and Biomedical Applications

Dec 31, 2024

Muhammad Talha Irfan

has successfully completed the online, non-credit Specialization

AI for Mechanical Engineers

In this Specialization, learners developed expertise in leveraging AI for mechanical engineering applications, focusing on design optimization, autonomous systems, and energy and healthcare innovations. The series included hands-on projects that applied AI models and techniques essential for addressing real-world challenges, preparing participants to lead technological advancements and drive impactful solutions in their fields.

Wei Lu, PhD
Professor of Mechanical
Engineering
University of Michigan
